

PRECISION AND INNOVATION

FROM THE CONSTRUCTION SITE DIRECTLY TO PRODUCTION

Solaflex's patented digital measuring system streamlines workflows and minimizes errors, enhancing efficiency at every stage. Say goodbye to illegible hand-drawn sketches.

Simple, supported, and intuitive measuring

Error-free transfer of measurements

Effortless creation of complex contours

Maximize time and cost efficiency

Create production data directly on-site, minimizing the effort required for job preparation.

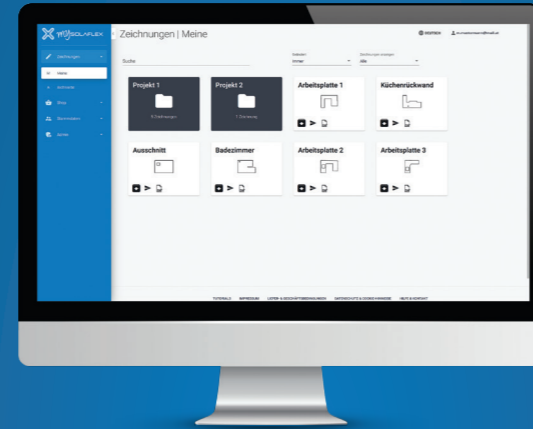

Export drawings in DXF or PDF formats and tables in CSV.

Available at all times

SOLAFLEX BRIDGES THE GAP BETWEEN CRAFTSMANSHIP AND INDUSTRY!

my SOLAFLEX

MySolaflex serves as the central hub for your Solaflex account, offering a comprehensive overview of all your Solaflex drawings and products.

TRADE 4.0

PERFECT MEASUREMENTS IN A FEW SIMPLE STEPS

X SOLAFLEX
DIGITAL MEASURING

solaflex.com

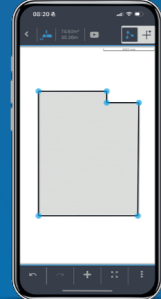

PATENTED

IF YOU WANT TO BE READY FOR DIGITALIZATION, THEN YOU'VE GOT TO START NOW!

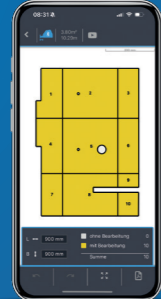

1. Freeform measurements

for right-angled contours, perfect for floor plans.

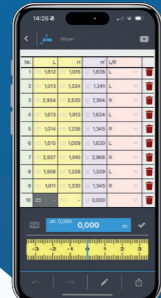

2. Coordinate-based measurements

ideal for capturing slopes, angles, and meeting high-precision demands (e.g., kitchen counter-tops, glass cutting, large-format tiles, etc.).

3. Table-based measurements

enables the recording of measurements in a fully customizable table (e.g. windows, doors, etc.).

PREVENT
MISTAKES &
SAVE TIME

Quick and simple digital measurements! Instantly digitize and visualize your results by transferring data directly from your digital tape measure or laser distance meter into the Solaflex app.

Upon completion, easily export your drawings and tables as PDF, DXF, or CSV files, enabling you to continue working immediately.

DOWNLOAD APP NOW!

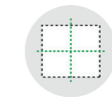

Create DXF and PDF files
with the ability to add photos and notes.

Project & Drawing Management
drawings are automatically saved and neatly organized into project folders.

Templates
add and customize for an even more efficient workflow.

Freeform & Coordinate Mode
measurement methods for creating precise drawings

Lock in actual measurements
lock the created contour and easily add or subtract tolerances and dimensions.

Grout grid
effortlessly create, customize, and apply to your drawing.

Bill of Materials (BOM) Breakdown
detailed display and dimensioning of individual elements

Table View Mode
customize tables, save as templates, directly input measurements and text and export as CSV files.

Intuitive, guided operation
enhanced with video tutorials
